Instruction for HW8

Part II.

The basic tree structure of a KML file is shown below:

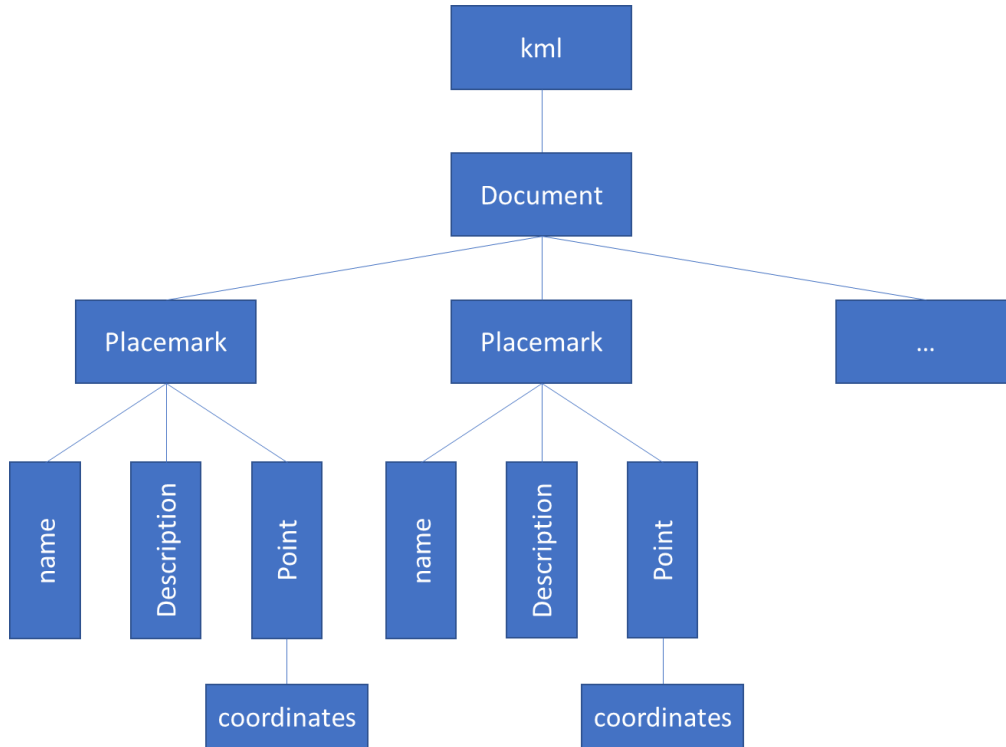

And here is a sample of KML file:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<kml xmlns="http://www.opengis.net/kml/2.2">
  <Placemark>
    <name>Simple placemark</name>
    <description>Attached to the ground. Intelligently places itself
      at the height of the underlying terrain.</description>
    <Point>
      <coordinates>-122.0822035425683,37.42228990140251,0</coordinates>
    </Point>
  </Placemark>
</kml>
```

Part II&III.

For visualization with Google Earth, search "Google earth download" or go to
https://www.google.com/earth/desktop/ to get an older version to load your KML successfully.

Part III.

The PNG files used for this part are zipped in "color_label.zip". Unzip it into the current
directory so that the function knows where these files are.
